Dr. Dimitry Palceski is proud to help Central Floridians put their “best face forward.” Whether he’s treating a teenager with acne, surgically removing skin cancer, or erasing a wrinkle, Dr. Palceski has the perfect prescription for keeping your skin looking and feeling its best. Armed with the latest knowledge in his specialty and experienced in the newest techniques, Dr. Palceski is passionate about his patients and his practice.

His office, Reflections Dermatology & Center for Skin Care, located in the upscale setting of Baldwin Park, is a true reflection of Dr. Palceski and his commitment to beauty. “When designing our space, I felt it was important to create an environment that was not only aesthetically pleasing, but relaxing as well,” says Dr. Palceski. Mission accomplished! Meticulously decorated down to the last detail, Reflections Dermatology combines a palette of soft, tranquil colors with a sophisticated décor; a true delight for the senses.

Unsurpassed in design, his office is equally impressive in regard to function. From the high-tech electronic medical records software that allows the office to be eco-friendly and paperless, to the state-of-the-art equipment, to the impeccable customer service provided by Dr. Palceski and his staff, the experience is seamless. “From check-in to check-out, we strive to make each visit to our office a positively memorable experience,” says Dr. Palceski.

Never without his sense of humor, Dr. Palceski has a unique talent for connecting with his patients and putting them at ease. “I treat all patients equally. Whether you come see me for a medical condition such as eczema or rosacea or for a cosmetic procedure such as Botox or laser rejuvenation, it is my goal to help you look and feel as good on the outside as you do on the inside,” he says. As a board certified dermatologist and dermatologic surgeon, Dr. Palceski is exclusively trained to diagnose and treat all conditions of the skin. “I feel very fortunate to be a specialist in my field. Not only is it one the most difficult residencies to obtain in medicine, but it is truly a blend of art and science and has allowed me to unite my love for surgery with my critical eye for aesthetics,” he says.

“The future of dermatology has never looked brighter,” adds Dr. Palceski. “With new advancements in science and technology, we are now able to reverse or slow the signs of aging and the environment using non-surgical procedures designed to enhance, rejuvenate, and restore the skin. It’s truly remarkable.” Patients have never had so many choices when it comes to the care of their skin. Dr. Palceski encourages people to make a wise choice and seek the care of a board-certified dermatologist.
